ABSTRACT

This bibliography lists materials on coal mining and related resources contained in the library of Southeast Community College (Kentucky). The guide is organized in six sections. The first section lists reference materials and is annotated. The second section lists books. Subject headings include coal miners, mines, and trade; mine safety; mineral industries; mineralogy; mining engineering; strip mining; and United Mine Workers of America. The third section lists indexes and suggests subject headings. The fourth section is a list of periodicals owned by the library that are specifically concerned with coal and coal mining. The fifth section suggests subjects that might be found in the card catalog. The final section lists call numbers of related books by shelf section. (KC)

INFORMATION RESOURCES FOR
COAL MINING AND RELATED SUBJECTS
A BIBLIOGRAPHIC GUIDE

Compiled by Sha Li Zhang

University of Kentucky
Southeast Community College Library
Cumberland, Kentucky 40823
June 1989

Acknowledgement

The initial enthusiasm to compile this bibliographic guide was inspired by frequent inquiries for information about coal mining and related subjects from faculty and students in the coal mining program at Southeast Community College. It is the compilor's hope that this guide will be a sensitive response to our users' information needs and link these needs to library resources.

I am very grateful to J. Charles Heaberlin, the library director, and other library staff members. Their encouragement and continuing support make the completion of this guide possible.

Sha Li Zhang
June 1989

Preface

This pamphlet is a finding aid. It functions like the chart over an aisle in a supermarket. When you read the chart over an aisle in a supermarket, you have one of two questions in mind: 1) what are all the items I can expect to find as I go down this aisle? or 2) is the item I need going to be in this particular aisle? You can use this finding aid to see all the materials we have on coal mining or related to coal mining. You would also use it to see if we have a specific source in the library.

The first of the six sections lists reference materials. These are books one goes to in order to answer specific questions. They have to be used in the library but this should not be a problem since one usually only has to read a couple of pages to answer one's specific questions.

The second section is called "monographs." Monographs are what one usually thinks of as "books." These can be checked out of the library since you will probably need to read entire chapters and perhaps the entire book to get the worth of it.

The third section is called "indexes." The indexes give you a way to find where a subject has been written about in a magazine. There is also a suggested list of subject headings you might try in any of these indexes. Do not limit yourself to the list of suggested subject headings. You may think of other subject headings which may be appropriate.

The fourth section is a list of magazines that the library has which are specifically concerned with coal and coal mining. The section is called "periodicals." You will find in the library that the words "magazine," "journal," "periodical," and "serial" all mean the same thing.

The fifth section suggests subject headings you might use in the card catalog to find books on your subjects. Notice the difference between this list and the list of subject headings in the third section. The earlier list is to be used when going to the indexes to find articles in magazines. The fifth section is what you need for the subject portion of the card catalog. This list leads you to books on the subject.

The sixth and last section gives you a way to browse along the shelves of the library for materials that might be of use to you. The call numbers are by shelf section so that one can go to that particular section of shelves just to see what kinds of books might be of use.

Remember that this pamphlet is just one tool and not the entire tool box of library resources. If you have used it and still have not gotten enough information, please ask the library staff. Maybe your particualr needs can be met in some way not included in this finding aid.

J. Charles Heaberlin
Director of SECC Library

MINE SAFETY 13
MINERAL INDUSTRIES 15
MINERALOGY 16
MINES AND MINERAL RESOURCES 17
MINING ENGINEERING 18
STRIP MINING.. 19
UNITED MINE WORKERS OF AMERICA 20

Section 3. Indexes 21

Section 4. Periodicals 23

Section5. Possible Subject Headings for Searching Monographs. 24

Section 6. Possible Call Numbers to Brawse for Material 27

Section 1. Reference Materials

(These are books often used to answer specific questions. They have to be used in the library.)

Blaster's Handbook. Wilmington, DE: the Technical Service Section, Explosives Products Division, E.I. du Pont de Nemours & Co., 1977. (Ref. TN279 .B54)

While it provides current information on commercial explosives and their most frequent applications, this handbook is primarily designed for use by skilled, experienced blasters instead of being a guide for the novice or the occasional user of explosives.

Chambers's Mineralogical Dictionary: with 40 Plates of Colored Illustrations. New York: Chemical Publishing Co., 1964. (Ref. QE355 .C46)

A very good dictionary for mineralogical research and studies.

Chironis, Nicholas P. Coal Age Operating Handbook of Underground Mining. New York: McGraw-Hill, 1977. (Ref. TN802 .C64)

This easy-to-use handbook covers such key areas of underground mining as longwall and shortwall methods and equipment, improved roof control and ventilation methods, fire control methods and regulations, etc.

Coal Mining Reference Book. Kentucky: Kentucky Mining Institute, 1958. Reprinted by Oklahoma State Department of Vocational and Technical Education, 1970. (Ref. TN295 .K4)

This ready-reference manual is intended to fill a much needed requirement in the state of Kentucky, especially with reference to the conservation of the lives and health of mine workers. While arranged in the question-and-answer form, the book presents materials in the simplest terms and language, easily understood by all.

A Dictionary of Mining, Mineral, and Related Terms. Compiled and edited by Paul W. Thrush and the staff of the Bureau of Mines. Washington, DC: U.S. Department of the Interior, Bureau of Mines, 1968. (Ref. TN9 .T53)

(Cont.)

55,000 individual terms with 150,000 definitions are provided for the use as a comprehensive and authoritative mining and mineral reference sources.

Hustrulid, W. A., ed. Underground Mining Methods Handbook. New York: Society of Mining Engineers of the American Institute of Mining, Metallurgical, and Petroleum Engineers, 1982. (Ref. TN151 .U5)

This handbook covers topics like general mine design, financial considerations, caving methods, underground equipment, and mine ventilation. All text articles are contributed by scholars, administrators, chief managers, engineers, and consultants.

International Coal 1976. Washington, DC: the National Coal Association and its Affiliate, the Coal Experts of Association of the United States, Inc., 1977. (Ref. HD9540 .1 H37A)

This book consists of statistics and coal trade information among the principal coal producing and consuming countries in the world, and provides details on their internal use of coal as well. Data on world energy consumption is also included.

Lindley, Curtis H. A Treatise on the American Law Relating to Mines and Mineral Lands within the Public Land States and Territories and Governing the Acquisition and Enjoyment of Mining Rights in Lands of the Public Domain. New York: Arno Press, 1972, 2 vols. (Ref. KF1819 .L5 1972)

"American Mining Law" is the subject of this treatise which introduces the different systems of mining jurisprudence in force at various periods in the countries from which the United States acquired its public domain. This comparative view of mining law, foreign as well as state, will at least be of historical interest, if it should serve no other higher purposes.

Lowry, H. H., ed. Chemistry of Coal Utilities. New York: Wiley, 1963. (Reserved book, 662.6 N213 0)

This is a self-contained supplementary to the two volumes of Chemistry of Coal Utilization, published in 1945. It includes such chapters as physical properties of coal, coal analysis and mineral matter, chemical situation and reaction, coal gasification, etc. Complete bibliographies are provided.

Munn, Robert F. The Coal Industry in America: a Bibliography and Guide to Studies. Morgantown: West Virginia University Library, 1965. (Ref. Z6738 .C6M8)

(Cont.)

As a tool in multidisciplinary research, this bibliography emphasizes the social sciences. Titles of real significance, pertinent dissertations and theses, and works are carefully selected. Bibliographies in these titles can also serve as a guide to those interested in a specific area or phenomenon.

Pearl, Richard M. Gems, Minerals, Crystal, and Ores: the Collector's Encyclopedia. New York: the Odyssey Press, 1964. (Ref. QE392 .P357)

The purpose of this book is to define, explain, and describe the most essential subjects on minerals and gems. It also includes important terms needed when learning about minerals, crystals, gems, the art of gem cutting, rocks, mining, meteorities, and the basic mineralogy and geology that underlie the entire field.

Peel, Robert, ed. Mining Engineer's Handbook. 3d ed. New York: Wiley, 1945, 2 vols.
(Reserved book, 622.02 P345)

This is a ready-reference book for mining engineers who seek information that is more complete and in more convenient forms.

Preston, Dennis Richard. Bituminous Coal Mining Vocabulary of the Eastern United States. Alabama: University of Alabama Press, 1973 (publication of American Dialects Society). (Ref. PE1702 .A5)

An in-depth occupational language and dialect research followed by a list of local mining terms used by general workers in on-the-job situations from twelve states of the eastern United States.

Tompkins, Dorothy Campbell, comp. Strip Mining for Coal. California: Institute of Governmental Studies, University of California, Berkeley, 1973. (Ref. Z5863 .S7T65)

It provides very valuable bibliographic information on strip-mining of coal and reclamation of strip-mined land.

White, Winifred D., comp. Cumulative Index of Mining Publications of SME / AIME, 1936-1968. New York: Society of Mining Engineers of the American Institute of Mining, Metallurgical, and Petroleum Engineers, 1972.
(Ref. Z6736 .W55)

This cumulative index for the period 1936-1968 includes all mining technical papers and feature

(Cont.)
articles published in Mining Engineering, Mining & Metallurgy, AIME Transactions, Coal Technology, and Mining Technology.

Section 2. Monographs

Section 3. Indexes

(The following list of indexes should contain bibliographic information on such subjects as coal, coal industry, coal mines and mining, etc. The list of subject headings may be used to search relevant articles in these indexes.)

Applied Science and Technology Index, 1974- monthly.

Business Periodicals Index, 1972- monthly.

News Bank Index, 1987- monthly.

Reader's Guide to Periodical Literature, 1970- monthly.

Possible Subject Headings for Searching Indexes:

COAL
- --ANALYSIS
- --BLENDING
- --CLASSIFICATION
- --SULFUR CONTENT
- --TERMINALS
- --TESTING
- --TRANSPORTATION
- --WEIGHING

COAL EXPLORATION

COAL-FIRED POWER PLANTS
- --AUTOMATION
- --DESIGN AND CONSTRUCTION
- --DUST CONTROL
- --ENVIRONMENTAL ASPECTS
- --FIRE AND FIRE PROTECTION
- --INDUSTRIAL CAPACITY
- --MAINTENANCE AND REPAIR
- --REMODELING
- --WASTE

COAL GASIFICATION PLANTS

COAL INDUSTRY

Section 4. Periodicals

("Periodicals" and "magazines" are often interchangeably used in the library. These magazines are specifically concerned with coal and coal mining.)

Coal: Incorporating Coal Age & Coal Magazine. Chicago, IL: Maclean Hunter Publishing Co., 1985- monthly. Microfiche: no. 1-12, 1984.

Coal Age (microfiche). New York: McGraw-Hill, 1986-

Coal Distribution Quarterly. Washington, DC: Energy Information Administration, Office of Coal, Nuclear, Electric and Alternate Fuels, U.S. Department of Energy, 1986- quarterly.

Coal Mining Newsletter. Chicago, IL: National Safety Council, 1988- bimonthly.

Department of Mines and Minerals, Commonwealth of Kentucky, Bulletin. Lexington, KY: Department of Mines and Minerals, 1976- monthly.

International Independent Coal Leader. 1983-

The Journal of Coal Quarterly. Kentucky: Western Kentucky University, Society for Applied Coal Science, 1988- quarterly.

Kentucky Coal Journal: the Monthly Newspaper of the Coal Industry. Lexington, KY: Host Communication, Inc., 1985- monthly.

United Mine Workers Journal. Washington, DC: the United Mine Workers of America, 1986- monthly.

Section 5. Possible Subject Headings for Monographs

(These subject headings can be used in the card catalogs to find books on your subjects.)
